

**CLAIMS**

1. A billiard chair assembly comprising,  
a plurality of legs, a seat, a back, a support system, a drawer, and a footrest;  
said plurality of legs each having a base end configured to engage a floor and a support end configured to support said seat;  
said seat having an upper sitting surface and a lower surface opposite said upper surface at a first height relative to said base end of said legs;  
said back extending from said seat;  
said support system disposed proximate said lower bottom surface of said seat and configured to allow said drawer to reciprocate between open and closed positions;  
said footrest being disposed intermediate said base end of said legs and said drawer;  
wherein said first height is selected such that said drawer remains above said base end of said legs when said drawer is in said open position.
2. The billiard chair assembly of claim 1 further comprising arms at a second height greater than said first height and supported by one of said seat or said back.
3. The billiard chair assembly of claim 2 wherein said arms include one of a cue stick retainer notch and a cup holder.
4. The billiard chair assembly of claim 1 wherein said drawer has an interior that is configured to accommodate any one of a billiard table brush, a billiard ball retainer box and a billiard chalk retainer box.
5. The billiard chair assembly of claim 1 wherein  
said support system includes a rear wall and opposing first and second sidewalls,  
said drawer including a base with opposing drawer front and back members extending therefrom and opposing first and second drawer sides extending therefrom to define a drawer interior; and  
wherein said rear wall, said first and second sidewalls and said drawer front member define a skirt for said seat when said drawer is in said closed position.
6. The billiard chair assembly of claim 5 further comprising arms at a second height greater than said first height and supported by one of said seat or said back.

7. The billiard chair assembly of claim 6 wherein said arms include one of a cue stick retainer notch and a cup holder.

8. The billiard chair assembly of claim 5 wherein said drawer has an interior that is configured to accommodate any one of a billiard table brush, a billiard ball retainer box and a billiard chalk retainer box.

9. The billiard chair assembly of claim 5 wherein said drawer base is positioned relative said drawer front such that said drawer front extends beyond said drawer base in a direction toward said leg base to form a lip for opening said drawer.

10. The billiard chair assembly of claim 9 further comprising arms at a second height greater than said first height and supported by one of said seat or said back.

11. The billiard chair assembly of claim 10 wherein said arms include one of a cue stick retainer notch and a cup holder.

12. The billiard chair assembly of claim 9 wherein said drawer has an interior that is configured to accommodate any one of a billiard table brush, a billiard ball retainer box and a billiard chalk retainer box.

13. A billiard chair assembly comprising,  
a plurality of legs, a seat, a back, a support system, a drawer, and a footrest;  
said plurality of legs each having a base end configured to engage a floor and a support end configured to support said seat;  
said seat having an upper sitting surface and a lower surface opposite said upper surface at a first height relative to said base end of said legs and said first height is selected such that said drawer remains above said base end of said legs when said drawer is in an open position;

said back extending from said seat;

said support system is disposed proximate said lower bottom surface of said seat and includes a rear wall and opposing first and second sidewalls, said first and second sidewalls L-shaped for support of said drawer when said drawer reciprocates between closed and said open positions;

said drawer including a base with opposing drawer front and back members extending

therefrom and opposing first and second drawer sides extending therefrom to define a drawer interior;

said footrest being disposed intermediate said base end of said legs and said drawer;  
and

wherein said rear wall, said first and second sidewalls and said drawer front member define a skirt for said seat when said drawer is in said closed position.

14. The billiard chair assembly of claim 13 further comprising arms at a second height greater than said first height and supported by one of said seat or said back.

15. The billiard chair assembly of claim 14 wherein said arms include one of a cue stick retainer notch and a cup holder.

16. The billiard chair assembly of claim 13 wherein said drawer has an interior that is configured to accommodate any one of a billiard table brush, a billiard ball retainer box and a billiard chalk retainer box.

17. The billiard chair assembly of claim 13 wherein said drawer base is positioned relative said drawer front such that said drawer front extends beyond said drawer base in a direction toward said leg base to form a lip for opening said drawer.

18. The billiard chair assembly of claim 17 further comprising arms at a second height greater than said first height and supported by one of said seat or said back.

19. The billiard chair assembly of claim 18 wherein said arms include one of a cue stick retainer notch and a cup holder.

20. The billiard chair assembly of claim 17 wherein said drawer has an interior that is configured to accommodate any one of a billiard table brush, a billiard ball retainer box and a billiard chalk retainer box.
